

2023-2024: Project ASOC or School of Open Cohesion

The School of Open Cohesion project lasts from September 2023 to May 2024. The class 3A will participate in the project as part of Active Citizenship class.

The 'At the School of OpenCohesion - ASOC project' is an innovative interdisciplinary educational programme intended for all types of high schools to promote civil-societal monitoring using open data and information and communication technologies.

As part of the 'At the School of OpenCohesion project', students will develop a civil-social monitoring project using public data and information about projects financed by European cohesion policy funds in their environment. They will use them to research the effectiveness and efficiency of European cohesion policy investments. Furthermore, they will use publicly available data and information about the projects, connected with the project implementers and involved the local community in the research. At the end of the research, the results will be published.

In the ASOC project, students will acquire digital and statistical skills and develop competencies such as developing critical thinking, problem solving, teamwork, interpersonal and communication skills.
