

2023–2025: International project KA1 Erasmus+ entitled Knowledge and competences for better employability (international practice of STŠ students abroad)

Partners: Secondary technical school Koper (STŠ) , Propaganda s. d. l., Propaganda Turismo sl, Aplicaproposta LDA

In October 2023, we organised a three-week mobility to Spain - to Valencia. We included 3rd-year computer science students and mechanical engineering students who did internships in local companies.

In April/May 2024, we are planning a three-week internship for 12 students majoring in car mechatronic, installer of machine installations and mechatronic operator. Students will do internships in local companies in Braga, Portugal.

In October 2024, we are planning the last mobility of the project - to Palermo, Italy, for 10 students of vocational and technical courses.

Objectives:

- Improvement of key professional competences and skills in the field of professional education of students,
- improvement of language competences, promotion of foreign language learning,
- upgrade of the Blue-Green STŠ students' eco-club,
- improvement of digital skills and use of digital tools,
- promoting inclusion, overcoming obstacles and cultural differences, developing intercultural competences.
