

### **Exhibition pavilion of Tomos' old-timers**

Duration: the project continues as part of the TOMOS WORKSHOP circle - restoration, processing and construction of engines (mentors are Nedjan Kastelic and Marko Rihter).

Collaborating partners: Hidria Ltd. and Koper Provincial Archives. STŠ took custody of certain motorcycle exhibits and Tomos' archive of technical documentation.

Purpose: to present recent history to students in a way to make them look at it with pride and draw inspiration from it for further innovation and entrepreneurial ventures.

The goal: to complete the existing collection with restored models and arrange the overall image of the pavilion to make it suitable and useful for various promotional and cultural events, and above all, open it to the general public.
